

Fun In The Sun Time!

It's been *ten years* since we created our *Dixboro Gardens*, and once again we welcome you to stroll through and see our collection of outdoor accessories!

We're ready to help you bring your winter ravished garden alive again! We've traveled the Midwest to find some fun and unique garden items, and returned with some fantastic finds! Our great new selection will surely fill all of your outdoor needs! You'll find planters, garden iron, windchimes, bird houses, lights, weathervanes, thermometers, benches, wreaths, and more!

If you're considering a new look for your own garden, just spend a few minutes wandering through our yard, sit on a bench, listen to the waterfall... look around, the sights and sounds are sure to inspire you!

New Thermometers!

These whimsical garden thermometers are not only functional, but also add personality to all of your garden decor! The four styles each come with a removable garden stake, should you decide to hang them on the wall!

Solar Lights & Globes

During the day these stylish landscape accessories charge in the sunlight; at night the LED automatically turns on to softly light lawns, flower beds, gardens, and walkways! Eight styles to choose from, (about 38" tall!) including 4 styles of garden globes!

Take A Peek At Who's Coming To Dixboro!

Join Artist Robin Davis the Saturday before Mothers Day!

We are thrilled to announce that the extremely gifted artist **Robin Davis** will be with us signing her new *Nature's Blessings® Angels* on **May 8th from Noon-4:00!** Robin's popularity has soared in recent years, and there is no doubt why: her talent for producing art that will not only put a smile on your face, but will tug at your heart strings too!

Robin's miniature figurines have been flying off our shelves for years, and her new angels are sure to follow the trend! Each *Nature's Blessings® Angel* was created as a reminder of all the great treasures our wonderful planet has to offer. With a dozen designs to choose from for yourself, family, friends, or as perfect gifts for all your favorite Moms,

Robin's angels are sure to inspire us all to be friendly to this beautiful earth.

Due to Robin's extremely busy schedule, *we are the only Michigan signing* she has agreed to this year, so don't miss this magical opportunity!

Rest And Relax On Milk Jugs!

We're not kidding! Our new inviting line of timeless, classic, outdoor furniture is nearly 100% comprised of recycled milk jugs!

These Adirondacks, tables, chairs, benches and swings are manufactured right here in the Midwest from "recycled milk jug lumber", which is impervious to all types of weather conditions, including rain, snow, salt water, sun, and ice! They will not rot, splinter or crack, and require no

waterproofing, painting, staining, or similar maintenance! It's perfect for patios, porches, decks, or right on the grass, and with no worries about durability, you'll be able to relish your extra leisure time! Just sit back, relax and forget about it!

In sticking with the "Green Theme", and to compliment this great furniture, we've added **Mad Mats** too! These unique outdoor rugs were created for serious outdoor use!

Also made from recycled post-consumer bottle waste, these mats will hold up over time. **Mad Mats** breathe, so they don't trap water, preventing them from mildewing or causing wood decks to rot!

Our relaxing deck is proof positive that being green can't get much better looking or more comfortable!

Liven It Up!

Add a breath of summer to your rooms with our new airy botanical collection. Vintage styled herbal prints are reproduced onto pillows, weathered boards, bottles and more, bringing a slice of life indoors, and adding a crisp fresh touch to all of your favorite areas in just a snap!
